DHRUVARAJ GR

Java Full Stack Developer

Shivamogga, Karnataka | ddhruva051@gmail.com | +91 78926 75574 | linkedin.com/in/dhruva-dhruva329981339

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on production experience building and optimizing REST APIs, Spring Boot services, and React interfaces backed by SQL/Hibernate. Strong foundation in Data Structures & Algorithms applied to real backend performance and reliability problems. Comfortable owning a feature end-to-end — from schema design to UI integration — in a Git-based, agile team environment.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+)
Backend: Spring Boot, RESTful API Design
Frontend: React, HTML5, CSS3
Database: MySQL, SQL, Query Optimization
Tools & Practices: Git, GitHub, Node.js
Currently Learning: JUnit, Docker, Spring Security (JWT)

INTERNSHIP EXPERIENCE

Software Development Intern · Tap Edtech Pvt Ltd Feb 2026 – May 2026

- Improved backend response reliability, measured by a 12% reduction in API error rate, by refactoring core Spring Boot services with clean, modular Java code.
- Enabled faster frontend-backend integration, measured by cutting integration bugs by 3-4 per sprint, by designing and delivering RESTful APIs consumed by React-based UIs.
- Increased query performance, measured by reducing average query time by 15%, by optimizing SQL schema design and Hibernate ORM mappings.
- Strengthened production troubleshooting throughput, measured by resolving 8-10 coding issues per month, by applying core Data Structures & Algorithms to live system challenges.
- Improved team delivery speed, measured by reducing merge conflicts/rework by 20%, by collaborating via Git/GitHub in an agile-aligned workflow.

PROJECTS

Smart IoT-Based Cold Storage Monitoring System · Personal Project Jun 2025 – Aug 2025

- Built a real-time temperature monitoring system, measured by continuous automated fan-speed control accuracy, using Arduino Uno and DS18B20 sensors.
- Streamed live sensor data, device status, and logs to a custom web dashboard by integrating NodeMCU ESP8266 with a browser-based monitoring interface.
- Demonstrated full-stack ownership by combining embedded firmware (C), hardware integration, and web-based data visualization in a single working system.

Live News App · Android Project Sep 2024 – Dec 2024

- Delivered a production-ready Android news app, measured by real-time article delivery with category filtering, using the News API.
- Improved codebase scalability and maintainability by implementing MVVM architecture with Java, XML, Retrofit, and RecyclerView.
- Reduced network latency and improved UI responsiveness by optimizing API calls and refining UX for a smoother reading experience.

EDUCATION

B.E in Computer Science & Engineering · JNNCE, Shivamogga Dec 2022 – May 2026
CGPA: 7.78 · Coursework: OOP, DBMS, Operating Systems, Computer Networks, Data Structures & Algorithms

Pre-University Education (PCM) · Vidya Bharathi College Aug 2020 – May 2022

CERTIFICATIONS

- Full Stack Web Development Certificate – Tap Academy (19 Sep 2026) · Cert. No. TA-FS-251621 · Java, Python, HTML5, CSS3, JavaScript, Spring, Hibernate, MySQL
- Java Programming Certificate – KEONICS
- Machine Learning Certificate – IBM
